FOOD DELIVERY & LOGISTICS PLATFORM

Entity–Relationship Diagram (ERD) | 20 entities | Derived from supplied SQLAlchemy models

USERS
PK id
full_name
email (unique)
password_hash
role
is_active
PK = Primary Key | FK = Foreign Key

ADDRESSES
PK id
FK user_id
label, address_line
city, region
latitude, longitude
PK = Primary Key | FK = Foreign Key

CUSTOMER_PROFILES
PK id
FK user_id (unique)
phone
PK = Primary Key | FK = Foreign Key

RESTAURANTS
PK id
FK owner_id -> users
name, description
location
is_active
PK = Primary Key | FK = Foreign Key

RESTAURANT_BRANCHES
PK id
FK restaurant_id
name, address
is_active
PK = Primary Key | FK = Foreign Key

RESTAURANT_STAFF
PK id
FK restaurant_id
FK user_id
job_title
UNIQUE restaurant_id + user_id
PK = Primary Key | FK = Foreign Key

MENUS
PK id
FK restaurant_id
name
is_active
PK = Primary Key | FK = Foreign Key

CATEGORIES
PK id
FK menu_id
name
PK = Primary Key | FK = Foreign Key

PRODUCTS
PK id
FK restaurant_id
FK category_id
name, description
price, is_available
PK = Primary Key | FK = Foreign Key

PRODUCT_VARIANTS
PK id
FK product_id
name
price_delta
PK = Primary Key | FK = Foreign Key

CARTS
PK id
FK user_id (unique)
PK = Primary Key | FK = Foreign Key

CART_ITEMS
PK id
FK cart_id
FK product_id
FK variant_id (nullable)
quantity
PK = Primary Key | FK = Foreign Key

ORDERS
PK id
FK customer_id -> users
FK address_id (nullable)
status, total
notes
PK = Primary Key | FK = Foreign Key

ORDER_ITEMS
PK id
FK order_id
FK product_id
product_name
unit_price, quantity
PK = Primary Key | FK = Foreign Key

ORDER_STATUS_HISTORY
PK id
FK order_id
FK changed_by_id -> users
old_status, new_status
note
PK = Primary Key | FK = Foreign Key

PAYMENTS
PK id
FK order_id (unique)
amount, status
provider_reference
PK = Primary Key | FK = Foreign Key

REFUNDS
PK id
FK payment_id
amount
reason
PK = Primary Key | FK = Foreign Key

DRIVERS
PK id
FK user_id (unique)
vehicle_type
is_available
PK = Primary Key | FK = Foreign Key

DELIVERIES
PK id
FK order_id (unique)
FK driver_id (nullable)
status
pickup_notes, delivery_notes
PK = Primary Key | FK = Foreign Key

DELIVERY_STATUS_HISTORY
PK id
FK delivery_id
FK changed_by_id -> users
old_status, new_status
note
PK = Primary Key | FK = Foreign Key

Lines show foreign-key relationships. Nullable and unique constraints are labelled where defined in the models.
